EXPERIENCE

Software Engineer (Full Stack)

Mar 2026 – Present

[Canny](#) | Toronto, ON

- Build and ship full-stack features for Canny's SaaS platform using **React**, **TypeScript**, **Node.js**, and **MongoDB**, leveraging Claude Code for implementation, debugging, and codebase exploration.
- Built **50+** tools for Canny's **Model Context Protocol (MCP)** server, enabling AI agents to interact with Canny's platform.
- Developed an **LLM-powered agentic Slack bot** backed by MCP tools, allowing users to perform actions in Canny through natural-language conversations.

Intermediate Backend Engineer

Jan 2024 – Mar 2026

[Wattpad](#) | Toronto, ON

- Architected and scaled backend systems and APIs powering **30M+** monthly users, using **Go**, **AWS**, **Kubernetes**, and **OpenAPI**, improving reliability and development velocity.
- Led development of [Polls](#), an interactive feature that increased overall user engagement by **15%** across the platform.
- Redesigned [Reading Lists](#), driving a **180%** increase in users adding stories and boosting retention.
- Mentored **3+** new engineers, accelerating onboarding and increasing team delivery capacity through code reviews, design guidance, and technical knowledge sharing.
- Served as a core **on-call** engineer, helping maintain uptime and reducing incident response times through rapid triage, debugging, and cross-team coordination.

Associate Backend Engineer

May 2023 – Jan 2024

[Wattpad](#) | Toronto, ON

- Built a new authorization system using Open Policy Agent, creating **20+** policies to migrate logic out of the monolith.
- Increased backend test coverage by **40%** by writing comprehensive API tests, enabling a smooth upgrade to **PHP 8**.
- Improved app stability by fixing high-impact bugs, resolving **500+** user-reported issues.
- Led backend development for launching [Wattpad Originals](#), collaborating with cross-functional teams to deliver a smooth user experience.

Associate Web Engineer

May 2021 – Aug 2022

[Wattpad](#) | Toronto, ON

- Migrated the Search experience from Backbone.js to **React**, driving an **11%** increase in user engagement within two weeks of launch.
- Built submission forms and contest banners for the 2022 Wattys, reducing API calls by **67%** and supporting **30K+** submissions with zero major launch issues.
- Developed core components for Wattpad's design system using **React**, **TypeScript**, **Storybook**, and **Webpack**, enabling 15+ engineers to ship consistent UI.
- Implemented WCAG **accessibility** improvements, reducing accessibility issues by **20%+** across the web app.

EDUCATION

University of Toronto | Honours B.S. in **Computer Science** with minor in **Applied Statistics**

Sept 2018 - June 2023

CGPA: 3.88/4.0 | **Awards:** Dean's List Scholar | **Honour Roll:** 2019-2020, 2020-2021, 2022-2023

TECHNICAL SKILLS

- **Programming Languages:** Go (Golang), TypeScript, JavaScript, Python, PHP, SQL
- **Backend:** Node.js, Redis, MongoDB, MySQL, Git, REST, OpenAPI, Microservices, Distributed Systems, MCP
- **Cloud & Infra:** AWS, Kubernetes, Docker, Terraform, CI/CD, Datadog, Sentry, SQS, CircleCI
